Java

```java
class Solution {
    public int countPrefixSuffixPairs(String[] words) {

    }
}
```

JavaScript

```javascript
/**
 * @param {string[]} words
 * @return {number}
 */
var countPrefixSuffixPairs = function(words) {

};
```

C++

```cpp
class Solution {
public:
    int countPrefixSuffixPairs(vector<string>& words) {

    }
};
```

C#

```csharp
public class Solution {
    public int CountPrefixSuffixPairs(string[] words) {

    }
}
```
